

Übung 3

Mittwoch, 18. April 2018

16:46

7 (A)

$$P = \frac{\text{günstige}}{\text{mögliche}}$$

$$P = \frac{\frac{3}{500} \cdot \frac{95}{100}}{\frac{3}{500} \cdot \frac{95}{100} + \frac{497}{500} \cdot \frac{1}{100}}$$

$$P = 0.364$$
